

How to determine which Fleck Control Valve Connection I need

If you have a 3-Valve Bypass already plumbed in your water lines, then you will only need a Fleck Yoke that will provide a connection between your home plumbing and the Fleck Control Valve.

Fleck Yokes are available in Noryl Plastic, that has Male Threads or a Stainless-Steel Yoke that has Female Threads. Both are available in 3/4" and 1" sizes.

If you don't have a 3-Valve Bypass plumbed in your water lines, then you will need to select either the Fleck Noryl Yoke with a Noryl Bypass or the Fleck Stainless Bypass Valve.

The Fleck Noryl Yoke with a Noryl Bypass will have Male Pipe Thread connection, available in 3/4" and 1" sizes.

The Fleck Stainless-Steel Bypass will have a Female Pipe Thread connection, available in 3/4" and 1" sizes.
